PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building full-stack web applications using Python, Django, Django REST Framework, React, PostgreSQL, and MongoDB. Experienced in developing REST APIs, authentication systems, responsive user interfaces, database-driven applications, testing, deployment. Interested in building practical software applications while continuously improving full-stack development and deployment skills.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Frontend: HTML5, CSS, React, Tailwind CSS

Backend: Django, Django REST Framework, REST APIs, JWT Authentication

Database: MongoDB, PostgreSQL

Tools: Git, GitHub

Deployment: Vercel, Render, Neon

PROJECTS

CareerKonnct | Full Stack Job Portal

Python | Django REST Framework | React | PostgreSQL | JWT

- Built and deployed a full-stack job portal with user registration, email OTP verification, secure authentication, job discovery, profiles, and application workflows.
- Developed REST APIs with Django REST Framework and PostgreSQL and integrated them with a responsive React frontend using JWT authentication and API testing.

Live Demo: <https://careerkonnct-ai.vercel.app>

FieldFlow — Field Service & Workforce Management Platform

Python | Django REST Framework | React | TypeScript | PostgreSQL | JWT

- Built a role-based field service platform connecting customers, business owners, and field workers through service requests, worker assignment, scheduling, and job-status workflows.
- Implemented REST APIs, JWT authentication, role-based access control, service management, notifications, and PostgreSQL-backed workflows; deployed the frontend on Vercel and backend on Render.

GitHub: <https://github.com/yashwanthmadipedi/Fieldflow>

Live Demo: <https://fieldflow-beta-drab.vercel.app>

ServiceDesk — Service & Ticket Management Platform

JavaScript | React | Vite | IndexedDB

- Developed a responsive service-desk platform with role-based workspaces for service managers, support agents, and requesters, including ticket queues, SLA monitoring, notifications, analytics, and knowledge-base workflows.
- Built interactive dashboards, ticket timelines, Kanban workflows, local data persistence, responsive UI, and browser-based application state using React and IndexedDB; deployed as a frontend-only application on Vercel.
